## MICROMESH

### QUICK AND EASY !

THE BEST FINISHING PROFILE FOR GYPSUM BOARDS  
TO PUT ALL THE CHANCES ON YOUR SIDE

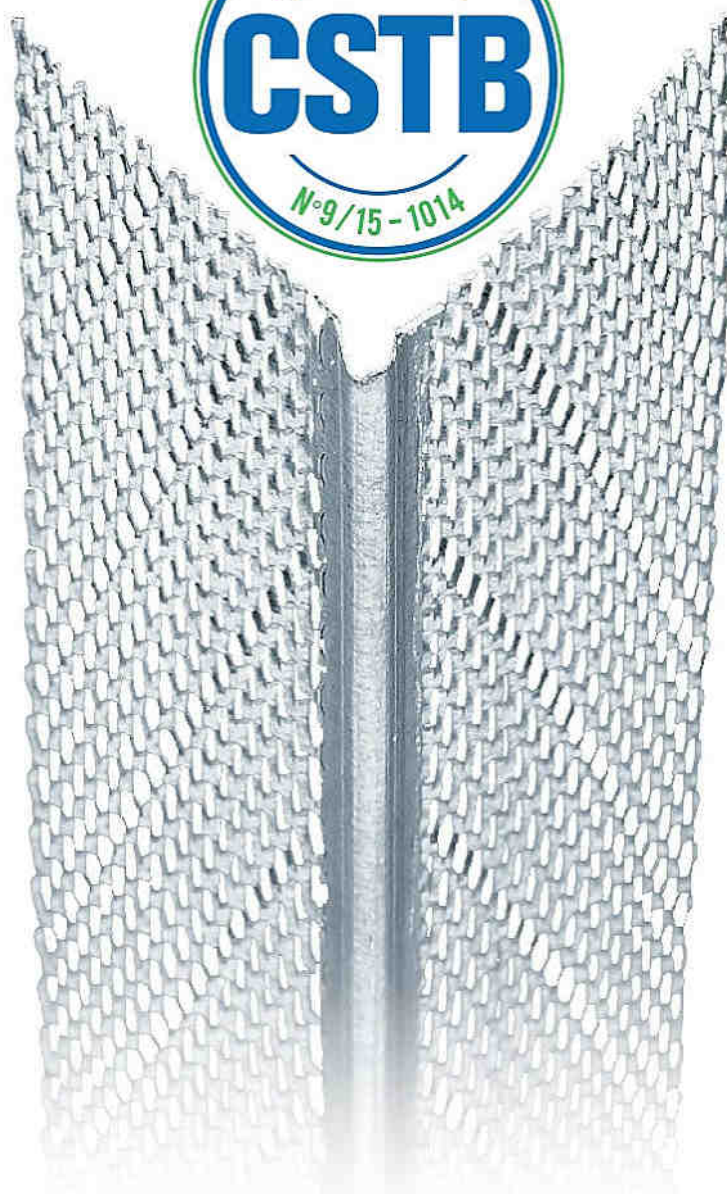

- ✓ Easy to use, thanks to the dry and fast fixing on the gypsum boards accessible to all !

- ✓ Micromesh is a time saving profile : 2 coats of plaster instead of 3

- ✓ An even better finishing quality.

At the end, a perfect finishing with a great shock-resistance. The "aluzinc" (AZ 150) coating of the steel we use for the production also offers a superior resistance to the corrosion.

# Micromesh 0113

Technical datasheet	Standard dimensions *
<ul style="list-style-type: none"> <li>Aluzinc material (AZ150) for a better resistance against corrosion</li> </ul>	2,45m x 60 (147,00m)
<ul style="list-style-type: none"> <li>Expanded metal wings for a better connection between profile and joint compound</li> </ul>	2,75m x 60 (165,00m)
<ul style="list-style-type: none"> <li>1mm joint compound thickness for a perfect finishing on the gypsum board</li> </ul>	3,05m x 60 (183,00m)

\* Other dimensions on demand - min. quantities required

## Quick and easy application

1 Dry fixing of the Micromesh on the gypsum board thanks to the «clinch-on» tool (fixing every 50 cm)

**Good idea:** The Clinch On. Quick and easy fixing without nails, screws or staples.

2 Plastering of the first coat on both sides of the edge.

3 After a drying period, application of the second and last coat of finishing joint compound (thickness : 1mm on the board).
